Frameworks React.js, Astro.js, Next.js, Knockout.js, jQuery, Node.js

Tools Figma, Git, GitHub, Vercel, .NET, VS Code

WORK EXPERIENCE

Porter Airlines • UX/UI Web Developer June 2022 — Present

- ♦ Built, styled, shipped, and validated 10+ new features for company website using client-side scripting and frameworks such as JavaScript, Knockout.js, C#, jQuery, LESS, and more within the .NET environment
- ♦ Worked together with project managers, designers, QA and other developers to convert business requirements into polished digital products at a 2-week agile cadence
- ♦ Presented perspective and guidance within collaboration of multiple projects, improving the approach to problem solving and documentation across teams
- ♦ Establishing standards for accessible web components by following cross-browser compatibility and accessibility guidelines, resulting in increased quarterly customer satisfaction scores across the site

Neo Culture Studios • Freelance September 2021 — June 2022

- ♦ Built and maintained 5+ websites for local businesses, generating over \$500 dollars of revenue a month
- ♦ Conducted research into UX-specific problems, translating into deliberate features developed with technologies and server-side handling such as React.js, Next.js, Chakra UI, SCSS, Node.js, AJA, and more
- ♦ Built trust with clientele through principles of punctuality and diplomacy

ChaiSweets • Freelance September 2019 — September 2021

- ♦ Designed and developed client's website, contributing extensively to encapsulating brand theme using Figma
- ♦ Assisted client with an ardent promotion of their startup, resulting in over 15 new clientele and 65+ following on social media
