Tools Figma, Git, GitHub, Vercel, .NET, VS Code, Cursor, ChatGPT

Work Experience

Porter Airlines · UX/UI Web Developer June 2022 — Present

- Built, styled, and validated 25+ website features with JavaScript, HTML, LESS, React, and ASP.NET, elevating user experience and creating opportunities for new revenue streams across thousands of monthly visitors
- Worked closely in the UX and design processes, ensuring high-fidelity prototypes aligned with business goals and development needs on a 2-week agile cadence
- Provided strategic guidance to project managers, designers, developers, and QA to strengthen documentation practices and problem-solving approaches for improved cross-team efficiency
- Established standards for accessible web components by following cross-browser compatibility and WGAC guidelines, increasing quarterly customer satisfaction scores across the site

Neo Culture Studios · Freelance September 2021 — June 2022

- Bridged UX research and full-stack implementation by exploring client needs, drafting 75+ Figma mockups, and delivering features with React.js, Next.js, SCSS and Node.js, streamlining the design-to-deployment system
- Maintained websites for 6+ local businesses, generating over \$550 dollars of revenue per month

ChaiSweets · Freelance September 2019 — September 2021

- Led the design of a client website in Figma, developing a cohesive design system with 30+ reusable components and producing 100+ prototypes to capture brand identity
- Supported startup promotions with new brand assets, boosting engagement and attracting 15+ new clientele
